

Inovonics is pleased to introduce two new products to serve DAB / DAB+ radio broadcasters worldwide. Tuning all of Band III and conforming to Worldwide standards, these compact receivers each meet a particular need for monitoring the digital broadcast off-air.

These compact INOmini receivers are sized to fit three units in our 19" 1U Rack Shelf for a professional installation. Broadcasters can choose from a wide variety of Inovonics' INOmini models for a customized "RackPack" solution that fits their unique needs.

INOmini 660 DAB/DAB+ Confidence Monitor

FEATURES:

- Reception of all standard DAB and DAB+ broadcasts
 - Easy setup using the LCD screen and jog-wheel navigation of the receiver's menu tree
 - Front-panel display of most-essential DAB and DAB+ PAD (Program-Associated Data) information.
